bodily harm and damages

The acts complained of in this suit concern: A medical

malpractice, I recieved a gunshot injury to the lower back a in an out. While being treated for this injury a tube that was too big was forced down my throat. From this taken place I have permanent breathing damage. I kept a trachea over a year, and had to have multiple surgeries just to have it remove. After the trach came out I then had a lack of oxygen, breathing damage, lost of speech, and now I'm limited in activities. It's very hard for me to perform without getting winded are taking to people with a clear voice, or speaking a sentance without giving out of breath. Now I'm unable to work and perform jobs as I did before. I also can't do things with my kids and family that deals with alot of movement thank you for veiwing

my case. I've tried for years to file this claim to see if I was eligible for compensation.

(If you need more space, or wish to include any further information for consideration, please attach additional sheets.)

I seek the following relief:

for my pain and suffering, for the fact that this is a permanent situation cause by the doctor at Pitt. I know longer sound, breath, or perform the same as before. I wish to not have anymore related surgeries, because the doctor explained, my voice and breathing only gets worse. In this case I would like some compensation that could help take care of me and my family for my suffering and being neglected.
